### Calculation of complimentary tickets

**Step 1.** Take the total number of tickets needed, including chaperones and divide that by eleven. That gives you the number of complimentary tickets you will receive.

**Step 2.** Subtract the number of complimentary tickets you should receive from the total number of tickets needed, and that gives you how many you should pay for.

**Step 3.** Take the total you should pay for and multiply that by \$14.50, and that will give you your total.

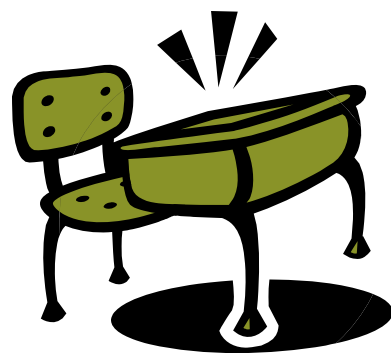

Soda is provided free for all students throughout the day
